About This Game

There was Jack,
Just a lumberjack.
But bad times have come -
Big evil rabbits attacked.
They've enslave all of them
And our Jack became a SuperLumberjack!

Chop wood and do it quickly to get more points. Be careful: do not hit the rabbit with an ax. Otherwise you will lose.

History Mode:

Complete all 24 levels. Find out what the rabbits want, and help Jack bring peace back to earth!

Arcade Mode:

Set records, play with friends in "Double Mode", discover new characters and locations.

+ **interesting/fresh game concept.**

- **No flexibility in gamepads supported.**

Another co-op game with a terrible support for DirectInput gamepads made on Unity engine. (Stardust Vanguard, In Space We Brawl,...).

Supported controllers for Black & White Bushido:

<http://www.gallantgames.com/pages/incontrol-supported-controllers>

If your gamepad (and 3 of your's friends) is not on that list - then don't expect that gamepad to work. (Again, that list is meant for *this* game only.)

This is a link given by a developer [on a forum](#), of a list of gamepads that *should* work.

Mine is not there.

But that should be posted on "About This Game" page. Or at least a link to it.

(And not finding it out accidentally when you are wondering why the game ignores your gamepad.)

update: I was able to get my gamepad to work with a [x360ce](#)[x360ce.com].

- **Not many maps (5).**

- **Overall little in content:**

Versus mode

<http://steamcommunity.com/sharedfiles/filedetails/?id=764112665>

with 5 maps

<http://steamcommunity.com/sharedfiles/filedetails/?id=764112965>

and a "challenge mode":

<http://steamcommunity.com/sharedfiles/filedetails/?id=764112869>

That's the entire game.

If you like local co-op games then you can buy it. (You could also try "Samurai Gunn" instead - it may be better in some ways).

This game is fun but little in content.. this deserves GOTY status.. works great but i had one problem, i can't use the on-screen keyboard with it (using a controller) but i can use the on-screen keyboard with the regular mouse. would be awesome if there is a fix for that.. YOU should definitely get this. I published to it a poor game you should play. Utter pants. Slows down your computer, only 4 official wallpapers, the rest have been done by steam users.. This game is absolutely hilarious if you like soccer and want to have a good laugh and score some insanely stupid goals 10V10. I mean its not bad because you can play it but its not completed

theres no animations sound is bad, theres almost no players

but its not bad its just not completed

5/10. A great but simple game. You must pilot a helicopter through enemy fire and rescue soldiers in sometimes hard to reach places. On its most basic settings the guns are automated and flight is controlled with only 2 buttons. There are currently 25 missions. With 4 hours into the game I have completed every level at silver or above. I have 6 yet to get gold medals in. I will be going back to get them. There are also 5 dog tags to collect on each level, but I feel less driven to find all of those. Missions are short and sweet usually 5 minutes to complete, never more than 10. It makes for a great time waster between chores or when nagging roommates are nearby. It has been a fun, bug free game, great to waste a few minutes or a whole afternoon.. It's an excellent game. A fun and difficult platformer. Good music and style. I like it.

But it's incredibly buggy. It's built in JS with an HTML5 engine and I've had no end of game breaking bugs and floor clipping. Random behaviour. Playing through it on another platform I broke through the floor and it autosaved in an unrecoverable way and had to delete my save file from near the end of the game. Maddening.

It also does not in any way work in the Steam Link. White screen and crashing.

So the game is good, but it's plagued by technical problems and is no longer supported.
